**WiseTrader Toolbox v1.0.2.0 Beta Released!**

Written by Administrator

We are proud to announce a new major release of the WiseTrader Toolbox:

- New indicator Adaptive N Cycle Goertzel Discrete Fourier Transform. Based on Meyers Analytics papers.
- New indicator Endpoint Fast Fourier Transform. Based on Meyers Analytics papers.
- New Adaptive/Smooth Indicator StochRSI.
- New Adaptive/Smooth Indicator Momentum.
- More neural network layers can now be used and also activation functions can now be specified for each layer. There are now also 6 different activation functions to choose from.

- New scaling algorithm was introduced Mean & Standard Deviation for noisy data. So now the type of scaling algorithm can be chosen.
- Input and output scaling range can now be changed.
- Function changes for true Multi-stock neural network training via the Neural Network Wizard.
- Greatly improved documentation.
- Many other improvements and fixes.
