WiseTrader Toolbox v1.0.1.4 Beta Released!

Written by Administrator
Monday, 30 August 2010 13:12

- Added adaptive Wilder's Moving Average.
- Added ability for neural networks to have multiple outputs not just one. Via AddNeuralNet
workOutput   fun
ction
.
It is no longer the case that the last array added is the desired output. This change will require
some formulas to be updated but also make it easier and less error prone to train neural
networks.

- Added multiple output neural network example.
- Fixed some inconsistency in tutorial AFL examples and updated them to reflect new
changes.
- Improved and updated documentation.

You no longer need to uninstall the previous version of the toolbox. The installer should
automatically upgrade the files now. But please check that you are running 1.0.1.4 to be sure.

Important:

Neural network files created with the previous version of the   toolbox, version 1.0.1.2 and
earlier, need to be deleted as they are no   longer compatible. Just delete the folder
WiseTraderToolbox from   C:Program FilesAmiBroker
